ALCOHOL & OTHER DRUG INTERVENTION PROCEDURE

The District encourages faculty members to be observant of student behavior and to participate in a program of intervention. Faculty members may use the record of observable behavior to determine whether or not behavior should be reported.

If the faculty member decides that the behavior indicates a possible prohibited activity, the student should be:
1.   Reported to the Administration and taken immediately to the Administrator's office.
2.   Referred to the school counselor.

If the Administrator has reasonable suspicion that the student is under the influence, the student's parents will be notified and asked to pick up the student. If there appears to be imminent danger to other students, school personnel, and/or the student involved, the Administrator may have the student removed from the school by school, medical, or law enforcement personnel. If, in accordance with policy, the Administrator requires the student to submit to drug/alcohol testing, the student shall complete this testing prior to returning to school.

If the counselor, principal, or Superintendent believes that the student is indeed in need of intervention assistance, the counselor, principal, or Superintendent may call the student in for a conference. If the counselor calls this meeting, s/he shall notify the Administration of this conference. The student's parents shall be notified of this conference. Parents shall be requested to attend the conference. The counselor and Administration shall be required to attend and may receive assistance from a certified addiction counselor in how to confront students.

If, after conferring with the student, parent, and administration, the counselor believes that there is a probability that the student may be experiencing a drug or alcohol problem, the student and the student's parent(s)/guardian will be told that it is necessary that the student receive a formal chemical dependency diagnosis.
