

PROCEDURE FOR ENTERING AND LEAVING THE BUILDING

Students may enter the school building 30 minutes prior to their first scheduled activity. As a general rule, students should leave the building promptly upon dismissal. Exceptions to this rule would include students with the following obligations:

1. Make-up or special work at the teacher's request
2. Athletic practices or games
3. Drama or music practices or performances
4. Other recognized occasions or events

Students should not be allowed to leave or enter the building through the boiler room or any other school area that is considered potentially hazardous.

No child should be required to stand outside a school building in weather conditions that might endanger his/her health and well being. Parents who send their child to school earlier than the established time should be informed of this requirement and asked to arrange for the child to arrive at the school at a time when supervision is available.
